

# QUALIFICATIONS:

Working for the past 13 years with businesses, non-profits and individuals alike, I have consistently delivered creative solutions in a variety of situations. My proven ability to build rapport with clients has allowed me to design, develop, and implement everything from websites to logos to print collateral. In working with a variety of clients I have come to understand and embrace the importance of thorough, open communication, and working within a budgeted amount of time as well as money. My experience working as a team leader, an individual designer, and as a member of a design team has given me great perspective on how to work effectively in any role.
